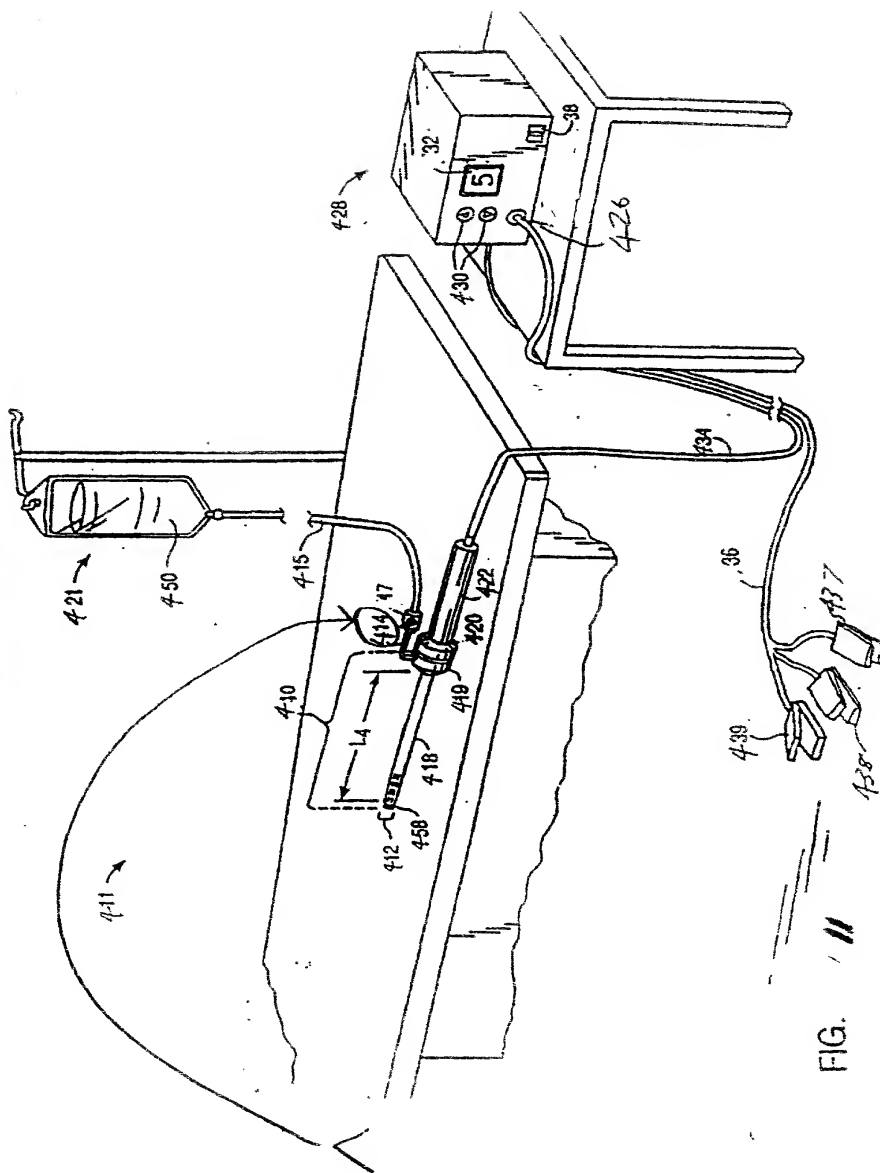

FIG. 11

A hand-drawn schematic diagram of a vacuum system. The diagram includes the following components and labels:

- 630**: A rectangular component, possibly a pump or motor, connected to a line labeled **601**.
- 602**: A wavy line representing a hose or pipe.
- 604**: A junction point where multiple lines meet.
- 603**: A small component or valve on a line.
- 614**: A junction point where a line splits into multiple branches.
- 687**: A label for a bundle of lines.
- 684**: A component or valve on a line.
- 646**: A component or valve on a line.
- 605**: A label for a line or component.
- VACUUM**: A label indicating the system's purpose.
- 628**: A label for a component or valve.
- 637**: A label for a component or valve.
- 675**: A label for a component or valve.
- 692**: A label for a component or valve.
- 624**: A label for a component or valve.
- 600**: A label for a line or component.
- 662**, **664**, **666**, **668**: Labels for a series of components or valves along a line.
- 686**: A label for a line or component.
- 36**: A label for a line or component.

The diagram shows a complex network of lines and components, likely representing a vacuum system for a specific application.
